

# Download File PDF Exam Builder Ocr A Level

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

The screenshot shows a user interface for 'Exam Builder Ocr A Level'. At the top, it says 'Overview of First half autumn term' with a 'Back to builder' button and a 'Print scheme' button. Below this, there are two main sections: 'Week 1' and 'Week 2'. Each week section is divided into three columns: 'Statements', 'Teaching activities', and 'Notes'.  
Week 1:  
- Statements: 'Recognise and use equivalence between simple fractions and mixed numbers.' with examples like  $\frac{2}{6} = \frac{1}{3}$ ,  $\frac{1}{2} = \frac{2}{4}$ ,  $\frac{1}{2} = \frac{2}{4}$ ,  $\frac{1}{2} = \frac{2}{4}$ . Below it, 'Add, subtract, multiply and divide simple fractions (proper and improper), including mixed numbers and negative fractions.' with examples like  $\frac{1}{2} + \frac{1}{3} = \frac{5}{6}$ ,  $\frac{5}{6} - \frac{1}{3} = \frac{2}{3}$ ,  $\frac{3}{4} \times \frac{4}{5} = \frac{3}{5}$ .  
- Teaching activities: 'Fractions (General)' resource contains one maths class exploring what it means to be a fraction and equivalence. This is from the National STEM Centre website resource and free to use, but a login is required.  
- Notes: 'This week is the first part of the half term dedicated to fractions. Subsequent weeks will build upon the learning outcomes used here.'  
Week 2:  
- Statements: 'Calculate a fraction of a quantity.' with example  $\frac{2}{5}$  of £3.50. Below it, 'Express one quantity as a fraction of another.'  
- Teaching activities: 'Peaches Today, Peaches Tomorrow' - This NRICH problem offers plenty of practice in calculating fractions of objects while ensuring learners to come up with problem solving strategies. It offers a good context for thinking about factors of numbers.  
- Notes: 'No notes added.'
